

The plot shows the transmitted signal $Q[n]$ (solid blue line) and the received signal $Q'[n]$ (dotted red line) over 100 symbol indices. The x-axis is labeled "Symbol Index" and ranges from 0 to 100. The y-axis ranges from 0 to 1. The transmitted signal $Q[n]$ is a binary sequence of 0s and 1s. The received signal $Q'[n]$ is a binary sequence that is slightly delayed relative to $Q[n]$. A legend in the top right corner identifies the two signals.
